DD/R-474-63

21 March 1963

MEMORANDUM FOR: Chief, Logistics Service Division
THROUGH: Chief, Special Intelligence Staff, OCI
SUBJECT: Pneumatic Tube Station, OEL

25X1A

1. The pneumatic tube station in Room 2F24 is behind the new barrier but on the [REDACTED] system. The majority of papers to be transported by the pneumatic tube system are SI papers and would have to go outside the barrier to reach OCI, OSI, and many other components with which rapid communication is required.

25X1A

2. It is our understanding that using the [REDACTED] station even to send SI material to the [REDACTED] station in the OCI Registration Branch would be a violation of security. Consequently, we would appreciate it very much if you would connect our OEL station to the [REDACTED] system at the earliest possible time.
